Problem Statements: Smart Campus Hackathon 2026

I. Unified Reimbursement Management System

Universities allocate funds to students for various purposes such as **individual academic activities, competitions, research travel, club events, and institutional programs**. However, the process of spending, documenting expenses, requesting reimbursements, and collecting advance allocations is often manual, inconsistent, and time-consuming.

Students frequently face:

- Financial burden due to delayed reimbursements
- Complex and unclear approval workflows
- Physical bill submission and documentation loss
- Lack of transparency in allocated vs. utilized budget
- Difficulty tracking reimbursement status
- Confusion regarding policy limits and eligible expenses

Administrators struggle with:

- Verifying and auditing uploaded bills
- Managing multiple reimbursement requests simultaneously
- Ensuring compliance with university financial policies
- Tracking advance funds and settlement balances
- Monitoring total institutional spending across departments

There is a need for a **secure, transparent, and automated digital budgeting system** that enables students to upload bills, request reimbursements, collect approved advance funds, and track budget allocations in real time.

Proposed Solution Structure

1. Budget Allocation and Visibility

- Individual and event-based budget assignment
- Category-wise limits (travel, logistics, hospitality, etc.)
- Real-time dashboard showing allocated, spent, and remaining balance

2. Advance Fund Request Module

- Students can request pre-approved allocated funds before spending
- Policy validation and multi-level approval
- Advance tracking and reconciliation after expense submission

3. Digital Bill Upload and Verification

- Upload receipts/invoices (image or PDF)
- Automatic extraction of key details (amount, vendor, date)
- Flagging of suspicious or duplicate claims

4. Reimbursement Workflow

- Structured approval process
- Accept / Reject / Request modification
- Real-time status tracking
- Digital payment confirmation

5. Financial Governance Dashboard

- Admin overview of all pending and processed claims
- Budget utilization analytics
- Department-wise and event-wise reporting
- Audit trail and compliance logs

WHAT IS THE PROBLEM STATEMENT ?

PROBLEM SUMMARY:

Student Problems

- Delayed Reimbursements
- Approval Confusion
- Manual Bill Submission
- No Budget Transparency
- Policy Uncertainity

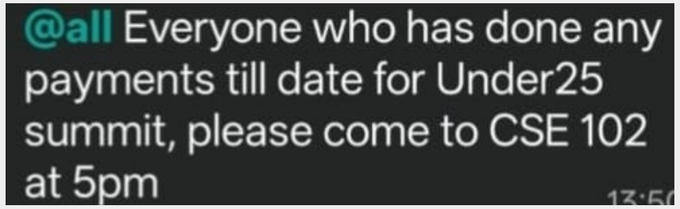
Admin Problems

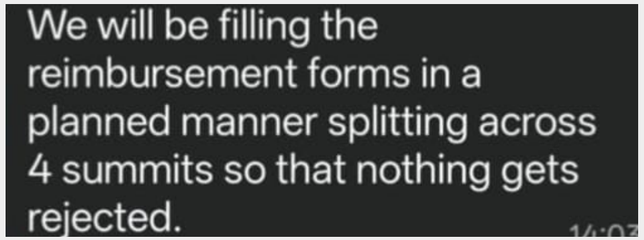
- Difficult verification
- Multiple requests
- Policy Compliance
- Advance Tracking
- Spending Overninght

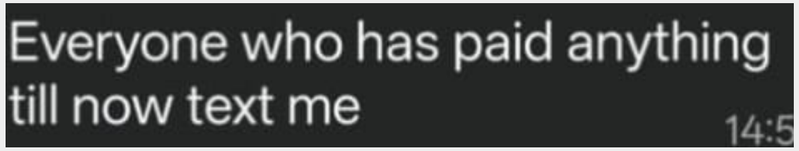
REAL TIME STUDENT CHALLENGE EXAMPLE :

while working with under25 sumit one of our team member observed the promblem and the no. of steps one has to go through while trying to get the reimbursement and the refund back after conducting an event for the university .

IT WAS NOTICED THAT SO MANY STEPS AND FORMS FORMATION WAS TAKING PLACE , WE HAVE THE FOLLOWING REAL EVIDENCE SCREENSHOTS:







Reimbify is a web-based reimbursement management system - *it digitalizes the entire expense lifecycle for students and university finance departments.*

Reimbify - 3 portals , one platform

STUDENT PORTAL

1) UPLOAD BILL
2) REQUEST ADVANCES
3) TRACK STATUS

ADMIN PORTAL

1) REVIEW
2) APPROVE
3) REJECT
4) COMMENT

FINANCE DASHBOARD

1) REAL TIME
2) AUDIT- TRAIL
3) ANALYTICS

IMPLEMENTATION

Reimagining reimbursements as a smart, transparent, and real-time digital experience - where every request is clear, every rupee is tracked, and nothing stays “pending.”

Advance Fund Request & Settlement (Student Module)

- *Request funds before spending*
- *Multi-level approval workflow*
- *Automatic adjustment during final reimbursement*

Smart Bill Upload & Verification (Student Module)

- *Upload receipts (image/PDF)*
- *Auto-extract key details (amount, vendor, date)*
- *Basic duplicate/suspicious claim detection*

Financial Governance Dashboard (Admin Module)

- *Overview of all pending & processed claims*
- *Budget utilization analytics*
- *Department-wise & event-wise reports*
- *Audit trail & compliance logs*

Streamlined Reimbursement Workflow (Student Module)

- *Request funds before spending*
- *Multi-level approval workflow*
- *Automatic adjustment during final reimbursement*

Digital Budget Allocation & Visibility (Student Module)

- *Real-time budget assignment (user/event/category)*
- *Live tracking: Allocated vs Used vs Remaining*
- *Centralized budget control for admins*

TECH STACK

- *Frontend- HTML, CSS, JavaScript*
- *Backend Python + Flask*
- *Database MySQL*
- *AI Feature Google Vision API*

Hosting : GitHub Pages & Render

SPECIAL FEAUTURES

Budget Guardrails

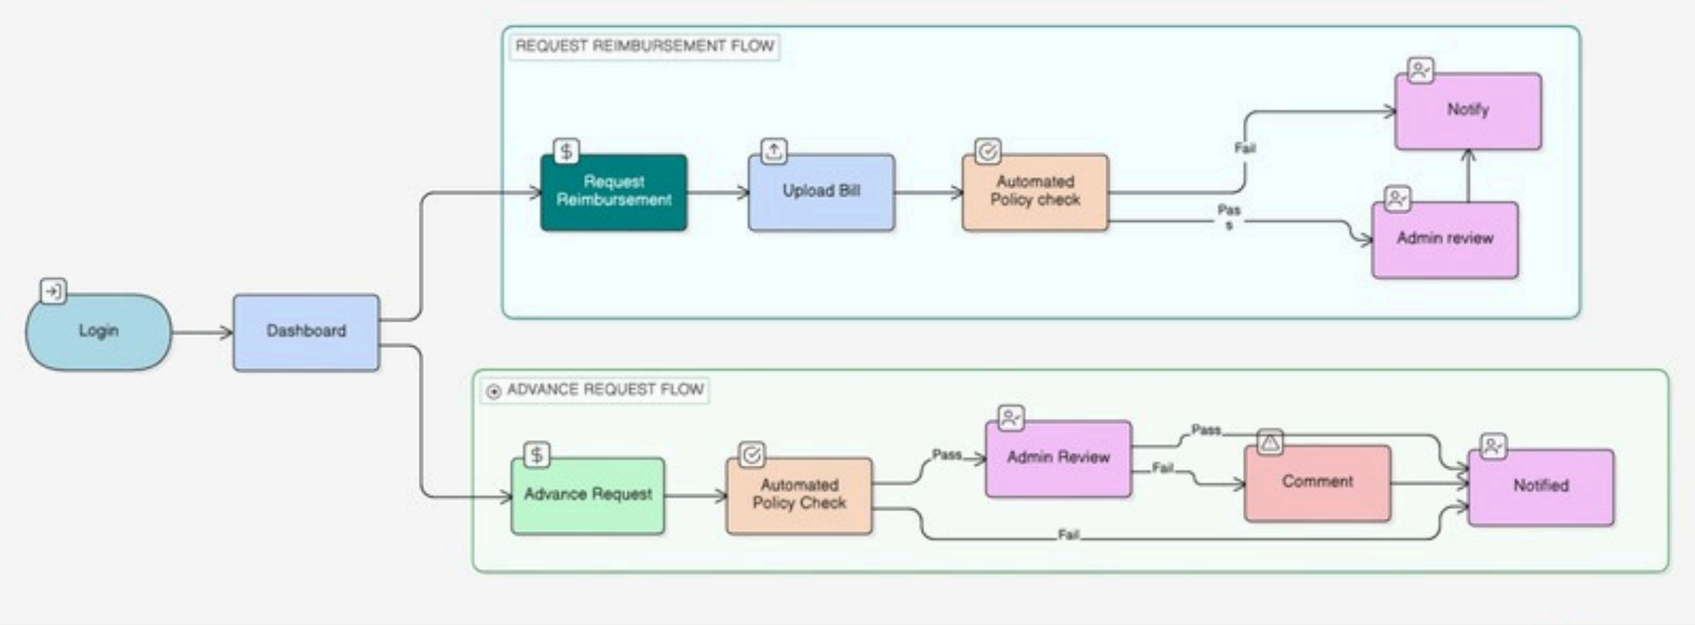
- *Monitors spending in real time*
- *Alerts students at 80% budget usage*
- *Warns before exceeding allocated limits*
- *Enables timely spending adjustments*
- *Promotes proactive, stress-free reimbursements.*

Policy Validation

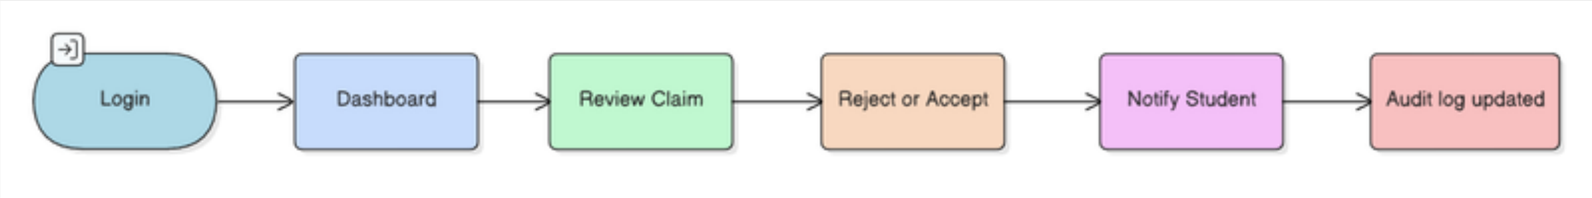
- *Auto-validates claims against rules*
- *Instantly rejects invalid submissions*
- *Shows clear rejection reasons*
- *Reduces admin workload*
- *Cuts unnecessary back-and-forth communication*

WORKFLOW

STUDENT FLOW



ADMIN FLOW



BENEFITS AND IMPACT

EFFICIENCY FOR STUDENTS / GOVERNANCE FOR ADMINISTRATORS

Financial Inclusion: Eliminates the "out-of-pocket" burden for students through seamless advance fund requests.

Operational Speed: Reduces reimbursement cycles from weeks to days via automated digital workflows and AI bill verification.

Total Transparency: Real-time dashboards provide a "single source of truth" for allocated vs. utilized budgets.

Data-Driven Insights: Analytics allow admins to identify spending trends and reallocate underutilized funds effectively.

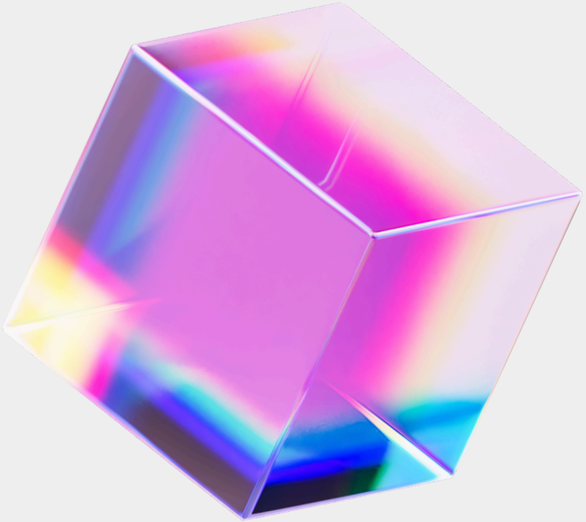
THE ROAD AHEAD

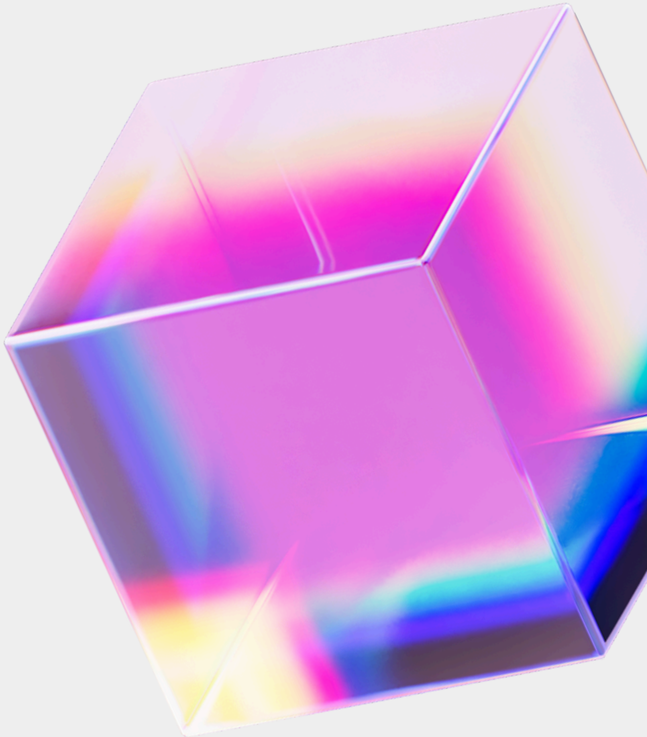
The Unified Reimbursement Management System replaces fragmented, manual paperwork with a secure, automated ecosystem- saving time, reducing financial stress, and ensuring institutional accountability.

Direct Disbursement: Integration with banking APIs/UPI for instant, one-click fund transfers

Advanced Fraud Detection: Using ML to identify doctored receipts or non-compliant spending patterns.

Vendor Ecosystem: A pre-approved marketplace where students can "charge" services directly to their budget.





THANK YOU
